

# COOL FLAME

## PD PRO 500

*Water Vapour Cassette with Lumisty Technology*

### LUMISTY TECHNOLOGY

Lumisty Technology is a proprietary system that creates a flame-like visual effect using a silent ultrasonic mist generator enhanced with heater and fans combined with active LED lighting.

### SIMPLIFIED INSTALLATION

Drop-in installation - the cassette is dropped into an opening and supported by the trim rather than legs. No venting slots required underneath.

### FLEXIBLE REFILLING

Three water supply options: integrated refill pump, external water tank connection, or direct water network connection for fully automatic operation.

### AROMA MODULE

The integrated aroma system can be activated on demand and offers programmable release intervals and adjustable intensity settings for your preferred scent dispersion.

### REMOTE CONTROL

The multifunctional remote allows for direct adjustment of flame tones, colour gradients, and flame height. You can also activate the crackling-wood sound for a multi-sensory experience.

### LCD TOUCH SCREEN

The integrated touch screen allows for direct system status viewing and settings adjustments. A digital slider offers precise control over flame tones, color gradients, and flame height as well as additional crackling effect.
